

Boost Production in '09!

Mytee's new vacuum booster gives you increased CFM for jobs that require longer hose runs. The booster goes in line between the extractor and wand, and can be used with any portable. Lightweight, small, and easy to handle, it can be stored easily on any truck. It allows you to use longer hose runs – thus reducing the need to move the extraction equipment.

Call to find out how to Boost your production in '09.

\$599.00

100 CFM

2" Cool Cuffs

Urethane Wheels
